

## EUROBOND IPA Wipes

Our heavy-duty cleaning wipes are ideally suited for cleaning all surfaces prior to bonding. Each 64gsm wipe is made of a special low lint material and impregnated with a blend of 70% Isopropyl Alcohol and 30% de-ionised water. The 'Flip Top' pot contains 100 wipes. These wipes can also be used to clean tools, instruments, and finished products.

<b>Colour:</b>	White
<b>Wipe Material:</b>	55% Woodpulp + 45% Polyester
<b>IPA Content:</b>	70%
<b>De-ionised water content:</b>	30%

### Application Instructions

Follow the procedure below for best results.

1. Remove a clean wipe and reseal pot immediately.
2. Clean the surface to be cleaned with cloth and remove any oil, grease, or dirt, then lightly abraded, and then cleaned again to remove any further dust or debris.

We strongly advise the pot is resealed immediately after use to preserve the longevity of the wipes.

Do not use meths, white spirits or aromatic cleaners as these will leave a microscopic film on the substrate which will contaminate the bond line and act as a barrier preventing the adhesive from adhering properly to the surface. We also recommend using Protective Nitrile Gloves when handling adhesives.

### Health, Safety, and Environmental Awareness

Please see the Safety Data Sheet (SDS) for more details on transportation, storage, handling, and other security guidelines.

### DISCLAIMER

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any other process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee or representation is made to its accuracy, reliability or completeness.
